

**SNiPER® is a breakthrough in environmental science.**

SNiPER® has been specifically formulated to kill harmful bacteria and virus and the most resilient molds without causing harm to you or the environment. SNiPER®'s proprietary formulation sets it above the rest. It does not use poison or harsh chemicals to weaken its microbial threat. It uses a mechanical function to completely inactivate its enemy. Its target will not revive or reinfest.

SNiPER® does not produce Volatile Organic Compounds (VOCs) into our air like certain cleaning products. It is even able to oxidize these toxic compounds when used in a fogger.

Pathogens cannot build up a resistance to SNiPER®, as with poisonous disinfectants. Therefore, SNiPER® cannot create "superbugs."

SNiPER® has multiple applications for your home. Eliminate other cleaners that do not have the disinfecting power and quality of SNiPER®.

**Environmentally Responsible**

SNiPER® inactivates bacterial and fungal spores for maximum protection. Some cleaners claim to kill 99.9% of "germs" but may not be killing the most life threatening virus, bacteria and spores. Spores can lay dormant for long periods of time and are hard to kill. When conditions become favorable again, they revive and reinfest. Sporing bacteria are the cause of a number of serious diseases in humans.

When using SNiPER® along with a proper cleaning regimen, you can be sure you are killing the most harmful virus, bacteria and their spores making it impossible for them to revive and reinfest.

**SNiPER®**

**SNiPER®**  
**The Ideal Biocide**

- Non-toxic Disinfectant
- Odor Eliminator
- Powerful All Purpose Cleaner
- Mold Remover
- Broadest Efficacy
- No harsh Chemicals
- Does not emit VOCs

**We don't want to just clean your home.  
We want to GREEN your home.**

## Kill MRSA, Swine Flu, Stachybotrys, Salmonella, E. coli, Streptococcus and more

SNiPER® is a smart cleaning and disinfecting system that far exceeds other products on the market. No longer must you use toxic and corrosive disinfectants to do a mediocre job. SNiPER® is able to kill the most harmful bacteria and virus and the most resilient molds. Traditional disinfectants are ineffective in controlling the growing problems of microbial infestation in the home, school and work environments. Introducing non-toxic SNiPER®. It is safe to you and your environment and effective in killing the most harmful microbial threats. If you maintain a cleaning regimen using SNiPER®, even new microbial threats introduced from outside factors are destroyed. Use SNiPER® and feel confident that you are protecting your home, your environment and thus your future.

## Sanitize Kitchens

Safe on all hard surfaces, including granite. Disinfect & clean dirt, grime, greasy build up & remove odors. Kill blood borne pathogens from raw meat.

- Safe to use in nurseries
- Safe to clean and disinfect all surfaces
- Disinfect toys
- Remove stains and odor from spit up, vomit, dirty diapers, and more
- Disinfect harmful bacteria and virus including Swine Flu

## Disinfect washer & laundry

- Kill the fungus and remove mildew smell from washer
- Disinfect and remove odor from laundry
- SNiPER® breaks up and removes stains from clothing: food, vomit, even blood stains

**SNiPER®**

**Eliminates**

**Odors:** smoke, skunk, body, sweat, urine (including cat urine), garbage, vomit, pet, feces, mildew odors and much more. . .

## Sanitize bathrooms

- Use to kill germs in sinks, toilets, bathtubs, etc
- Non-corrosive
- Will not leave a film or residue
- No toxic chemicals or bleach
- No harsh smell or fragrance
- Removes mold, mildew & soap scum

## Treat AC Units:

We breathe contaminated air that is continually circulated throughout our indoor environments. Viruses have hit pandemic levels in our school and work environments aided and encouraged by our closed loop HVAC systems. Dirty units make it harder for the unit to function properly and lead to higher utility costs.

## SNiPER® Smart Fog

**For cleaner, greener air**

Use our SNiPER® Smart Fog System in conjunction with your air ducts to distribute the disinfecting power of SNiPER® throughout your house for total decontamination.
