

Quit Searching for Effective Odor Eliminators

Unique SNIiPER technology eliminates odor on contact. It does not mask odors like other products. It uses next generation technology to destroy odor causing micro-organisms.

Use SNIiPER to Protect the Health of Your Pets

SNIiPER kills harmful pathogens while remaining safe to you, your pet and your environment. It does not use bleach or harmful chemicals to get the job done. It does not weaken the pathogen using poison, like other disinfectants, but uses a mechanical action to disassemble the microbial threat on the molecular level. This action ensures that SNIiPER cannot create a "superbug".

SNIiPER kills MRSA, E. coli, Salmonella, Swine Flu and more.

SNIiPER®

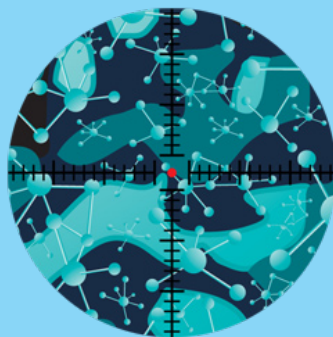

The Ideal Odor Eliminator

Remove Odors:
Cigarette
Skunk
Pet
Garbage
Urine
Dirty Diapers
Chemical
And much more . . .

Chemical
And much more . . .

Mom, I need SNIiPER. It's nontoxic & safe for me. It kills bacteria, virus, fungus & removes odors. Even I can't take this smell anymore. I want only the best. SNIiPER, please.

Eliminate Odors while keeping the Environment Safe!

Many odor removing products are toxic to you and the environment. Some only mask foul odors with strong scents and fragrances. SNI_PER eliminates the odor at the source. It breaks apart and destroys odor causing microbials. SNI_PER does not produce Volatile Organic Compounds (VOCs) like some cleaners and air fresheners. SNI_PER is also able to destroy VOCs produced in the environment.

Remove Smoke Odors

Use SNI_PER in a fogger for maximum effectiveness against foul smoke odor in homes, cars, RVs and more. Close all windows and doors. Fog for at least 5 minutes. Fog attics, crawl spaces and ventilation systems. Leave undisturbed for one hour. Severe cases may require a second treatment. Spray SNI_PER directly into ashtrays and then wipe clean. Spray on upholstery in vehicles to clean, disinfect and remove smoke odors.

**SNI_PER is SAFE,
NONTOXIC and
ENVIRONMENTALLY
FRIENDLY**

SNI_PER is able to oxidize such compounds as ammonia, formaldehyde, hydrogen sulfide, methane and more. These toxic chemicals are the source of irritating odors as well as a persistent health threat to the occupants of the building. When SNI_PER reacts with these toxic compounds, it renders them into nontoxic components. SNI_PER is able to remove these compounds without leaving toxic by-products.

Remove Household Odors

Spray or mist on sofas, chairs, carpets, bedding and more for disinfection and odor removal. Use in the kitchen to clean messes and remove odors from counter tops, cutting boards, microwaves, ovens, garbage cans and refrigerators. Use to clean bathrooms and remove odors from toilets, bathtubs and sinks. Keep a 4 ounce misting bottle in the bathroom to mist in the air to remove odors.
