

SNiPER® Cleaning and disinfecting directions

EQUIPMENT NEEDED:

- Adjustable Nozzle Spray Bottle with SNiPER®
- RL 1035B Fogger
- Clean absorbent cloth(s)
- Bucket of water and sponges
- Vacuum and Broom
- Gloves

CLEANING DIRECTIONS:

Lightly Contaminated Surfaces:

- 1) Remove and clean (sweep or vacuum) all floors
- 2) Remove all trash and debris from surfaces
- 3) Wipe down any collected dust dirt lint or gross filth from hard surfaces
- 4) Use fogger to spray all surfaces of Interior including ceilings, doors, windows, floors, floor mats, Furniture with an even coat of SNiPER®. Use a fine micron setting (7.5-12.0) It is not necessary to saturate or cause puddling.
- 5) Allow the SNiPER® to dwell for up to one minute to allow the surfactant to loosen any grime or dirt that is present.
- 6) Use clean, absorbent cloth(s) to wipe all surfaces very thoroughly, with care given to remove all substances or gross films that may be stuck on surfaces
- 7) Evaluate the odor and gross filth mitigation of each room and repeat the cleaning cycle if needed.

Heavily Contaminated Surfaces:

- * If heavy odor or gross filth exists in the structure, please use the following directions first to pre-clean heavily soiled or severely contaminated rooms or facilities. Integrate the following steps into your cleaning procedures above:
- 1) If surfaces are subjected to gross contamination, remove any large debris from the surfaces and dispose of appropriately. Then proceed with normal cleaning of surfaces with SNiPER®.
 - 2) Evaluate the odor and gross filth mitigation and repeat the cleaning cycle if needed.

Notes:

These directions should be applied as needed to clean, disinfect and deodorize quarters. If ULV fogger is used, after cleaning spray a fine mist of SNI[®]PER throughout the space and allow to settle and dry.

Contact Support:

If you have any questions on the direction of use or cleaning actions of SNI[®]PER, please call: (GER Inc.) Global Environmental Restoration, Inc. (877) 236.4710.
